Professional Summary

Computer Science undergraduate specializing in Artificial Intelligence, with hands-on industry experience in Generative AI and Agentic AI. Passionate about building AI-powered applications and intelligent systems, with project experience spanning AI integration, web technologies, and backend development.

Education

Parul University Vadodara, Gujarat
B.Tech in Computer Science and Engineering – Artificial Intelligence *2025 – 2029*

Experience

InternVision Technology Pvt. Ltd. Sep 2026 – Nov 2026
AI Intern – Generative AI and Agentic AI *Remote*

- **Generative AI:** Worked on projects involving Generative AI technologies and AI-powered application development.
- **Agentic AI:** Gained hands-on experience building Agentic AI projects and intelligent, task-oriented AI systems.
- **Project Development:** Collaborated on AI-focused development tasks, applying modern AI technologies to real-world problems.

Projects

NyayaSetu – AI-Driven Judicial Operations Platform View Code

- **AI-Powered Case Management:** Built an AI-assisted platform for undertrial case management that organizes case data and flags cases requiring attention.
- **Intelligent Document Processing:** Implemented OCR-based extraction, legal document intelligence, and semantic search for faster access to case information.
- **Explainable Analytics:** Developed explainable case-attention scoring and operational analytics to support data-driven judicial workflows.

LUKA – DataSense AI View Code

- **AI-Powered Learning Assistant:** Developed an interactive Data Science learning platform with an AI mentor that explains machine learning concepts.
- **Interactive ML Playground:** Implemented an ML environment supporting model training, configurable hyperparameters, and performance evaluation.
- **Learning Experience:** Built structured learning modules and interactive features to make complex data science concepts easier to explore.

Usua – AI Chat Assistant View Code

- **Generative AI Integration:** Developed a conversational AI application using the Google Gemini API to generate contextual responses.
- **Conversation Management:** Implemented persistent chat history and conversation management for organized, continuous user interactions.
- **Backend and Interface:** Built a responsive UI and Node.js backend with secure API key handling and frontend–AI service integration.

Technical Skills

Programming Languages: C, C++, Java, JavaScript, SQL
AI Technologies: Generative AI, Agentic AI, LLMs, Machine Learning Fundamentals, Semantic Search
Frameworks & Web: FastAPI, Node.js, HTML, CSS
Database: MongoDB
Developer Tools: Git, GitHub, Docker, Vercel

Certifications

Cloudscape Kickstart with Cloud Native View Certificate

Achievements

Smart India Hackathon (SIH) 2026: Participated in SIH 2026, collaborating with a team on an innovative problem-solving project.
